

DSWD DROMIC Terminal Report on Taal Volcano Eruption

27 April 2022, 6PM

I. Situation Overview

On 26 March 2022 at 8AM, the Philippine Institute of Volcanology and Seismology (PHIVOLCS) has raised Alert Level 3 over Taal Volcano after the phreatomagmatic eruption of the Main Crater at 7:22 AM to 8:59 AM on 26 March 2022 and two (2) subsequent phreatomagmatic events at 4:34 AM and 5:04 AM on 27 March 2022 have been recorded by the Taal Volcano Network (TVN) based on seismic records and visual cameras. Communities around the Taal Lake shores were advised to remain vigilant, take precautionary measures against possible airborne ash and vog and calmly prepare for possible evacuation should unrest intensify.

On 09 April 2022, 8AM, PHIVOLCS lowered the alert level status of Taal Volcano from Alert Level 3 to Alert Level 2 to reflect the overall decreasing trend in the level of monitoring parameters.
