

## **DSWD DROMIC Preparedness for Response Report #4 on the Observance of Semana Santa 2023**

as of 09 April 2023, 6PM

### **Situation Overview**

As the Asian country with the highest population of Christianity, the Philippines commemorates the yearly week-long celebration of Jesus Christ's sacrifice on the cross for the salvation of His people from sin and His gift of everlasting life. The "Semana Santa" or Holy Week starts on Palm Sunday and ends on Easter Sunday – the day where we celebrate Christ's resurrection from the dead. The whole week is observed in solemnity, with Holy Thursday and Good Friday recognized as official holidays by the state. As such, it is common that Filipinos begin to take leave from school or work as early as Holy Monday and lasting the entire week.

During this time, majority of Filipinos join the rush to go home to their respective hometowns and provinces to spend this holy festivity together with their families. Consequently, an increase in volume of people are expected in transport stations such as bus terminals, air and sea ports, which amplifies the vulnerability of these people to human-induced disasters. Naturally, we also cannot rule out the possibility of the occurrence of natural disasters during this period.

### **Weather Bulletin**

Issued at 09 April 2023 at 4PM, the Northeasterly Surface Windflow affects Northern and Central Luzon.

Cagayan Valley may experience cloudy skies with rains, while Central Luzon, Ilocos Region, and Cordillera Administrative Region may experience partly cloudy to cloudy skies with light rains brought by the Northeasterly Surface Windflow.

Eastern Visayas, Surigao del Norte, and Dinagat Islands may experience cloudy skies with scattered rainshowers and thunderstorms due to the trough of low pressure area (LPA).

Metro Manila and the rest of the country may experience partly cloudy to cloudy skies with isolated rainshowers or thunderstorms brought by either the trough of LPA or localized thunderstorms.
