

## DSWD DROMIC Report #7 on the Effects of Southwest Monsoon and Super Typhoon “Egay” as of 27 July 2023, 6PM

### I. Situation Overview

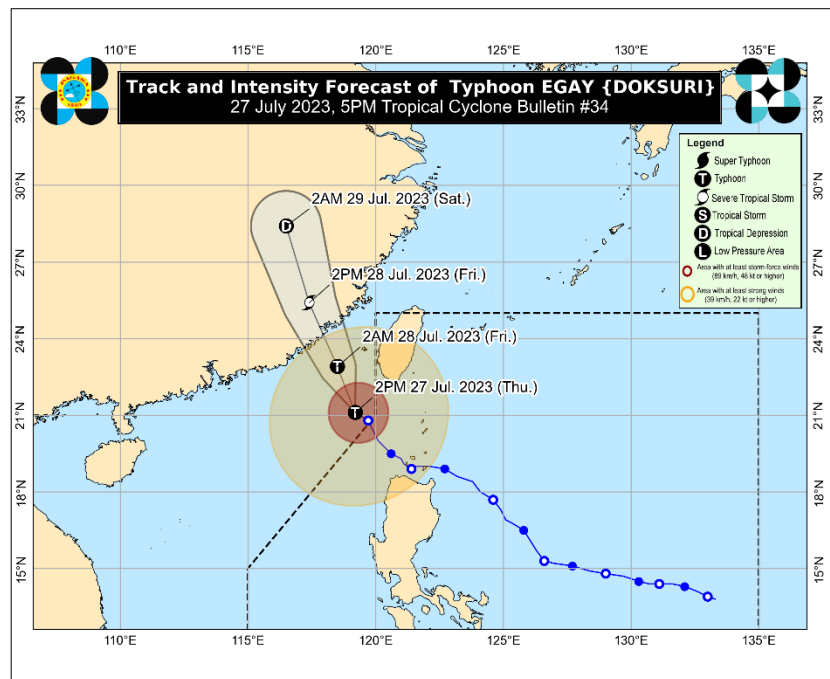

Issued on 27 July 2023 at 5PM, “Egay” maintains its strength as it moves West Northwestward away from the Philippine Area of Responsibility.

#### HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Forecast accumulated rainfall today

- 50-100 mm: Batanes, Babuyan Islands, and the northern portion of Ilocos Norte

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are highly likely especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

The Southwest Monsoon enhanced by EGAY will continue to bring occasional to monsoon rains over the western portions of Northern and Central Luzon and Southern Luzon in the next three days. For more information, refer to Weather Advisory #10 for Southwest Monsoon issued at 11:00 AM today and the 24-Hour Public Weather Forecast and Outlook at 4:00 PM today.

##### Severe Winds

Minimal to minor impacts from strong winds are also possible within any of the areas where Wind Signal No.1 is hoisted. The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

The enhanced Southwest Monsoon will continue to bring gusty conditions over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today: Luzon and Western Visayas
- Tomorrow: Batanes, Ilocos Region, Zambales, Bataan, Cavite, the southern portion of Quezon, MIMAROPA, Bicol Region, and Western Visayas
- Saturday: Zambales, Bataan, Cavite, Romblon, Antique, and Kalayaan Islands.

## **HAZARDS AFFECTING COASTAL WATERS**

Under the influence of EGAY and the enhanced Southwest Monsoon, a Gale Warning is in effect over several coastal waters along the seaboards of Luzon and the eastern and western seaboards of Visayas. For more information, refer to Gale Warning #10 issued at 5:00 PM today.

Rough to high or very high seas: Sea travel is risky for most vessels. All mariners are advised to remain in port or seek safe harbor until winds and waves subside.

Rough to very rough seas: Sea travel is risky for small seacrafts. For larger vessels, operating in gale conditions requires experience and properly equipped vessels. Mariners without proper experience or operating ill-equipped vessels are advised to remain in port or seek safe harbor.

## **TRACK AND INTENSITY OUTLOOK**

- EGAY is forecast to track north northwestward over the sea southwest of Taiwan, and the Taiwan Strait throughout the forecast period while gradually accelerating. It is also forecast to make landfall in the vicinity of Fujian, China tomorrow morning.
- EGAY is forecast to weaken prior to its landfall over China. Rapid weakening is expected once EGAY makes landfall over mainland China and moves further inland.

The center of the eye was estimated based on all available data 280 km West Northwest of Itbayat, Batanes (OUTSIDE PAR) (21.3 °N, 119.2 °E) Moving West Northwestward at 10 km/h with maximum sustained winds of 150 km/h near the center and gustiness of up to 185 km/h.

*Source: DOST-PAGASA Tropical Cyclone Bulletin #34*

## II. Status of Affected Areas and Population

A total of **158,076 families** or **538,021 persons** are affected in **1,686 barangays** in **Regions NCR, CAR, I, II, III, CALABARZON, MIMAROPA, V, VI, VII, VIII, and XII** (see Table 1).
