

DSWD DROMIC Report #5 on Super Typhoon “Goring” as of 30 August 2023, 6PM

I. Situation Overview

Issued on 30 August 2023 at 5PM, Super Typhoon “Goring” continues to maintain its strength as it approaches the Northwestern Boundary of the Philippine Area of Responsibility (PAR).

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

Forecast accumulated rainfall from today to tomorrow afternoon

- 100-200 mm: Batanes, Babuyan Islands, Ilocos Norte, the northern portion of Apayao, and the extreme northwestern portion of mainland Cagayan
- 50-100 mm: Ilocos Sur, Abra, the northwestern portion of mainland Cagayan, and the rest of Apayao

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are expected especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

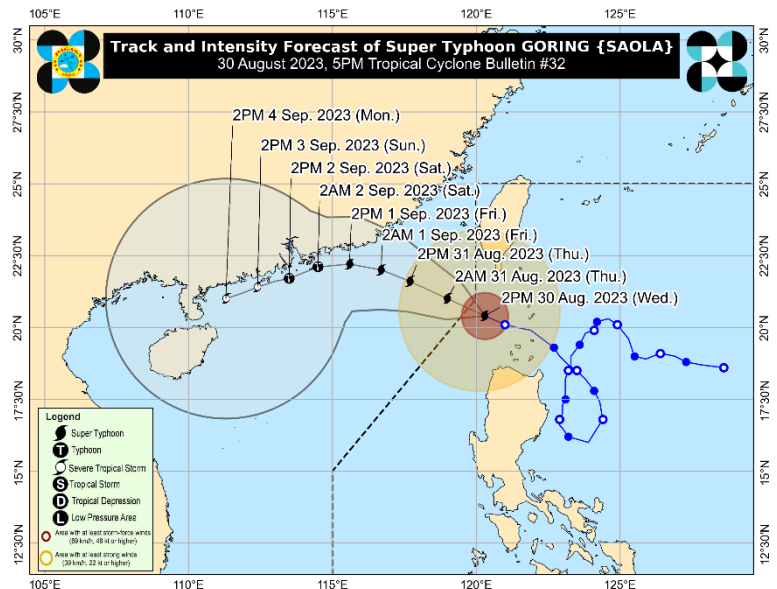

The enhanced Southwest Monsoon will also bring occasional or monsoon rains over the western portions of Luzon, and Visayas over the next three days. For more information, refer to Weather Advisory #12 for Southwest Monsoon issued at 11:00 AM today and 24-Hour Public Weather Forecast and Outlook at 4:00 PM today.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are also possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon will continue to bring gusty conditions over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today: Ilocos Region, Cordillera Administrative Region, Zambales, Bataan, Bulacan, Aurora, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas
- Tomorrow and on Friday: Ilocos Region, Cordillera Administrative Region, Zambales, Bataan, Bulacan, Pampanga, Aurora, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas

COASTAL INUNDATION

There is a moderate to high risk of storm surge which may cause flooding in the low-lying and exposed coastal areas of Batanes and the northern and western portions of Babuyan Islands.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect for most of the seaboard of Luzon and Visayas, and the eastern seaboard of Mindanao. Disruption in civilian maritime activities is expected over these areas (e.g., suspension of sea travel) due to hazardous sea conditions. For more information, refer to Gale Warning #15 issued at 5:00 PM today

TRACK AND INTENSITY OUTLOOK

- “Goring” is forecast to follow a mainly west northwestward path across the Luzon Strait from today until it exits the Philippine Area of Responsibility (PAR) tonight or tomorrow morning. Outside the PAR region, “Goring” will continue its west northwestward movement for the remainder of tomorrow before turning more westward on Friday (while slowing down), then west southwestward on Saturday (e.g., moving nearly parallel to the coast of Guangdong, China, although a landfall over the mainland China area on Sunday is not ruled out)
- “Goring” will likely remain as a super typhoon until Friday. Increasingly unfavorable conditions over the waters off the coast of Guangdong will trigger a weakening trend and by Monday, “Goring” will have weakened into a severe tropical storm.

The center of the eye of Super Typhoon “Goring” was estimated based on all available data at 185 km West of Itbayat, Batanes (20.5 °N, 120.1 °E) moving West Northwestward at 15 km/h with maximum sustained winds of 195 km/h near the center and gustiness of up to 240 km/h.
