

# DSWD DROMIC Report #6 on the Effects of Southwest Monsoon enhanced by STY “Goring” and STS “Hanna” as of 31 August 2023, 6PM

## I. Situation Overview

Issued on 31 August 2023 at 5PM, “Hanna” accelerates as it moves Westward over the Philippine Sea.

### HAZARDS AFFECTING LAND AREAS

#### Heavy Rainfall

The Southwest Monsoon currently enhanced by Super Typhoon Saola (Goring) (now outside the PAR) at this time is also being slightly enhanced by Hanna and Severe Tropical Storm Kirogi (currently outside the PAR).

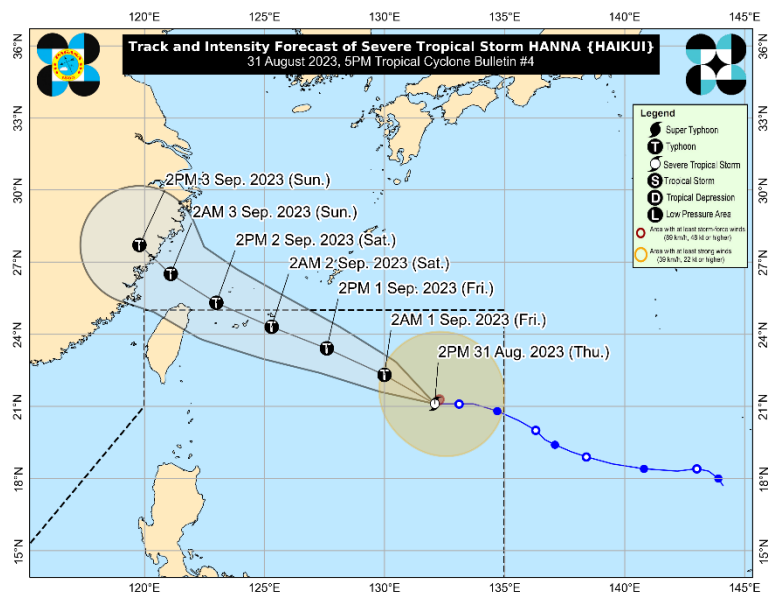

The enhanced southwest monsoon will bring occasional to monsoon rains over the western portion of Luzon in the next three days. For more information, refer to Weather Advisory #14 for Southwest Monsoon issued at 11:00 AM today and 24-Hour Public Weather Forecast and Outlook at 4:00 PM today.

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are expected especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

#### Severe Winds

The enhanced Southwest Monsoon will continue to bring gusty conditions over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today and tomorrow: Ilocos Region, Cordillera Administrative Region, Zambales, Bataan, Aurora, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, and the northern portion of Eastern Visayas.
- Saturday: Zambales, Bataan, Bulacan, Aurora, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, and the northern portion of Eastern Visayas

## HAZARDS AFFECTING COASTAL WATERS

Hanna is less likely to bring rough sea conditions over any seaboard of the country through the forecast period. However, due to the Southwest Monsoon that it is slightly enhancing, a Gale Warning is in effect for most seaboards of Luzon and Visayas. Disruption in civilian maritime activities is expected over these areas (e.g., suspension of sea travel) due to hazardous sea conditions. For more information, refer to Gale Warning #18 issued at 5:00 PM today.

## TRACK AND INTENSITY OUTLOOK

- Hanna is forecast to accelerate west northwestward and exit the Philippine Area of Responsibility (PAR) on Saturday while approaching the Ryukyu Islands. Hanna is forecast to gradually intensify until late Saturday or on early Sunday, when it is expected to reach its peak intensity. It may be upgraded into a typhoon within 12 hours while still inside the PAR region. This tropical cyclone is forecast to remain far from the Philippine landmass.
- Outside the PAR, it will continue to track west northwestward direction until Sunday before turning northwestward throughout the remaining forecast period. Hanna will continue to move over the East China Sea and make landfall over the east coast of mainland China on Sunday. Rapid weakening will ensue following its landfall over mainland China.

The center of Severe Tropical Storm Hanna was estimated based on all available data at 1,035 km East of Extreme Northern Luzon (21.2 °N, 131.8 °E) moving Westward at 15 km/h with maximum sustained winds of 110 km/h near the center and gustiness of up to 135 km/h.
