

# DSWD DROMIC Report #8 on the Effects of Southwest Monsoon enhanced by STY “Goring” and Typhoon “Hanna” as of 02 September 2023, 6PM

## I. Situation Overview

Issued on 02 September 2023 at 5PM, “Hanna” continues to intensify as it accelerates West Northwestward towards the sea East of Taiwan.

### HAZARDS AFFECTING LAND AREAS

#### Heavy Rainfall

Forecast accumulated rainfall for tomorrow

- 50-100 mm: Batanes

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are expected especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

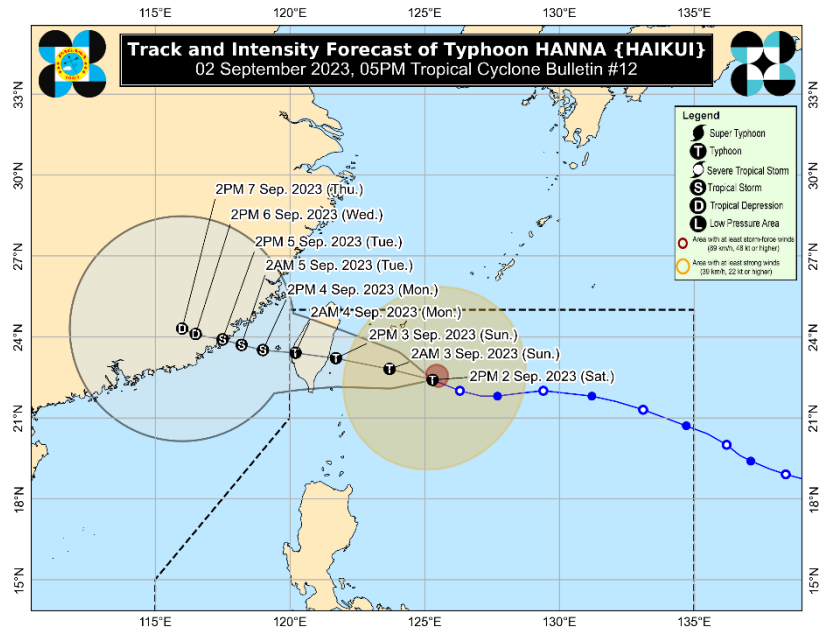

The Southwest Monsoon currently enhanced by “Hanna” will bring occasional to monsoon rains over the western portion of Luzon in the next three days. For more information, refer to Weather Advisory #18 for Southwest Monsoon issued at 11:00 AM today.

#### Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are also possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon will continue to bring gusty conditions over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today and tomorrow: Babuyan Islands, Ilocos Region, Cordillera Administrative Region, Nueva Vizcaya, Zambales, Pampanga, Bataan, Aurora, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, and the northern portion of Eastern Visayas.
- Monday: Batanes, Babuyan Islands, Ilocos Region, Cordillera Administrative Region, Nueva Vizcaya, Zambales, Pampanga, Bataan, Aurora, Bulacan, Metro Manila, CALABARZON, and most of Bicol Region, MIMAROPA, and Western Visayas.

## HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect for the northern and western seaboard of Luzon, the eastern seaboard of Central and Southern Luzon, portions of seaboard of Northern Quezon, the southern seaboard of Southern Luzon, and the western seaboard of Visayas due to the combined influence of “Hanna” and the enhanced Southwest Monsoon. Disruption in civilian maritime activities is expected over these areas (e.g., suspension of sea travel) due to hazardous sea condition. For more information, refer to Gale Warning #22 issued at 5:00 PM today.

## TRACK AND INTENSITY OUTLOOK

- “Hanna” is forecast to move west northwestward or westward while intensifying until it makes landfall along the east coast of southern Taiwan tomorrow afternoon or evening. Considerable weakening is expected as a result of “Hanna” crossing the rugged landmass of Taiwan. On the forecast track, “Hanna” will exit the Philippine Area of Responsibility and emerge over the Taiwan Strait around Monday morning.
- Outside the PAR region, “Hanna” is forecast to move erratically and may even become slow-moving or almost stationary over the Taiwan Strait while continuously weakening due to land interaction and increasingly unfavorable environment. By Wednesday or Thursday, “Hanna” will have weakened into a tropical depression

The center of the eye of Typhoon “Hanna” was estimated based on all available data 375 km East Northeast of Itbayat, Batanes (22.4 °N, 125.0 °E) moving West Northwestward at 20 km/h with maximum sustained winds of 140 km/h near the center and gustiness of up to 170 km/h
