

DSWD DROMIC Report #26 on the Effects of Shear Line as of 19 March 2024, 6PM

I. Situation Overview

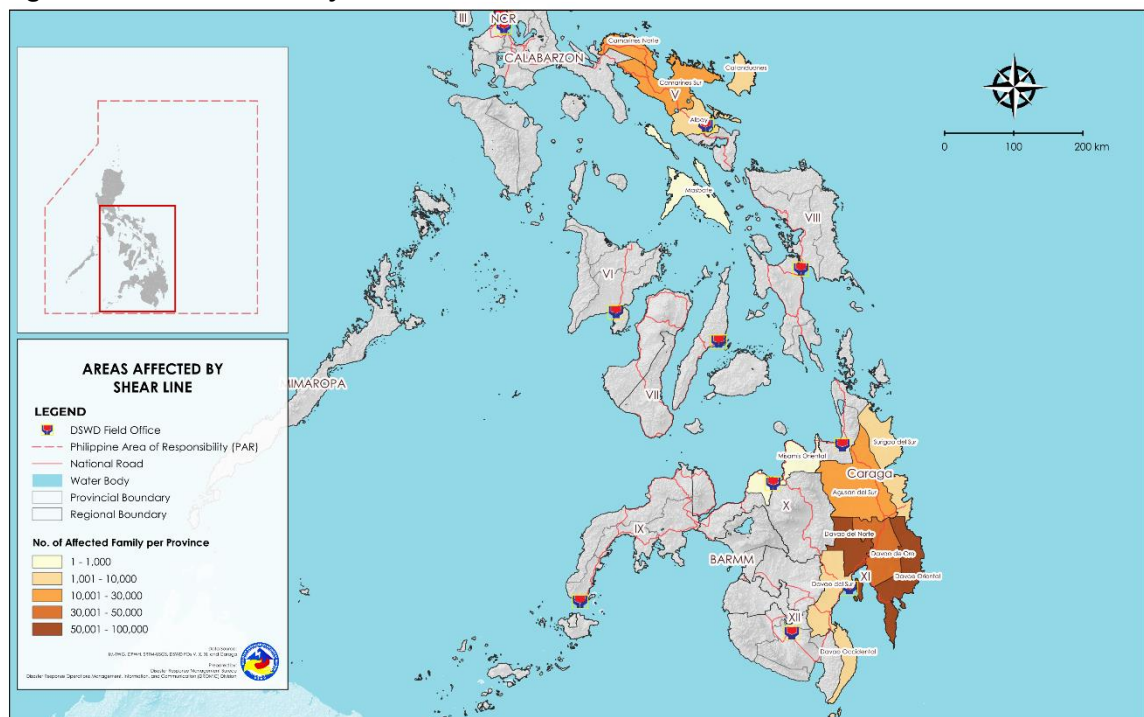

Forecasted by the Philippine Atmospheric, Geophysical and Astronomical Services Administration (PAGASA), the Shear Line, spanning from 8 to 20 January 2024, brought adverse weather conditions across multiple regions namely: Regions V, X, XI, and Caraga. Its effects resulted to persistent heavy rains that led to flooding and landslides while, scattered thunderstorms contributed to heightened weather instability. Livelihoods of farmers were adversely affected, due to continuous heavy rains while fisher folks faced challenges as the Shear Line impacted coastal areas, disrupting fishing activities and communities faced disruptions in their daily activities.

As the Shear line gradually weakened by 20 January 2024, the situation has improved and is no longer directly affecting the country. However, the said weather disturbance has left thousands of families and individuals affected, with evacuation centers activated to cater to the needs of displaced populations and key sectors. Furthermore, several casualties were recorded yet reports are still for verification.

The DSWD as Vice-Chair for Disaster Response, together with its Field Offices in Regions V, X, XI, and Caraga, are actively engaged in the response operation to address the displacement concerns and protection issue of the affected populations. Consequently, the DSWD promptly provided intervention to support the immediate needs of the affected families and individuals by means of response and early recovery programs and services, such as Relief Assistance, Emergency Cash Transfer and Assistance for Individuals in Crisis Situations.
