

# DSWD DROMIC Report #93 on the Effects of El Niño

as of 04 June 2024, 6PM

## I. Situation Overview

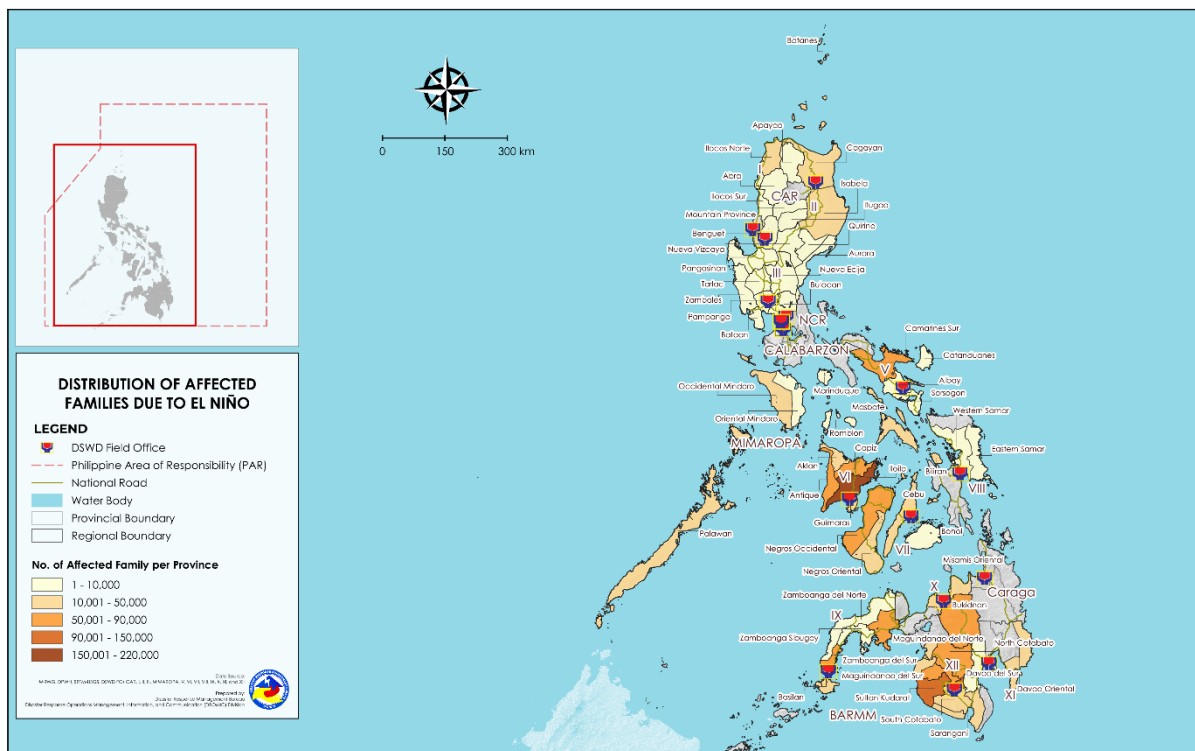

From July 2023 to April 2024, El Niño conditions were observed in the tropical Pacific Ocean. By May 2024, El Niño across the tropical Pacific Ocean continues to weaken but impacts such as hotter and drier conditions still persist. A transition from El Niño to ENSO-neutral conditions is anticipated in June 2024. However, a likelihood for La Niña to develop during the July-August-September (JAS) 2024 has increased to 69%. With these conditions, the PAGASA ENSO Alert and Warning System still remains at El Niño / La Niña Watch.

The effects of El Niño were felt in the Philippines, these conditions leading to agricultural damage and water shortages reported in various Regions.
