

DSWD DROMIC Report #1 on the Effects of TD “Enteng” and Southwest Monsoon as of 01 September 2024, 6PM

I. Situation Overview

Issued on 01 September 2024 at 5:00 PM, Tropical depression (TD) “Enteng” slightly intensified over the waters northeast of Northern Samar.

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Forecast accumulated rainfall: Today to tomorrow afternoon (2 September)

- 100-200 mm: Polillo Islands, Catanduanes, Camarines Norte, Camarines Sur, Masbate, Albay, Sorsogon, Northern Samar, and Samar
- 50-100 mm: Metro Manila, the rest of CALABARZON, Marinduque, Romblon, Eastern Samar, Biliran, and the northern portion of Leyte.

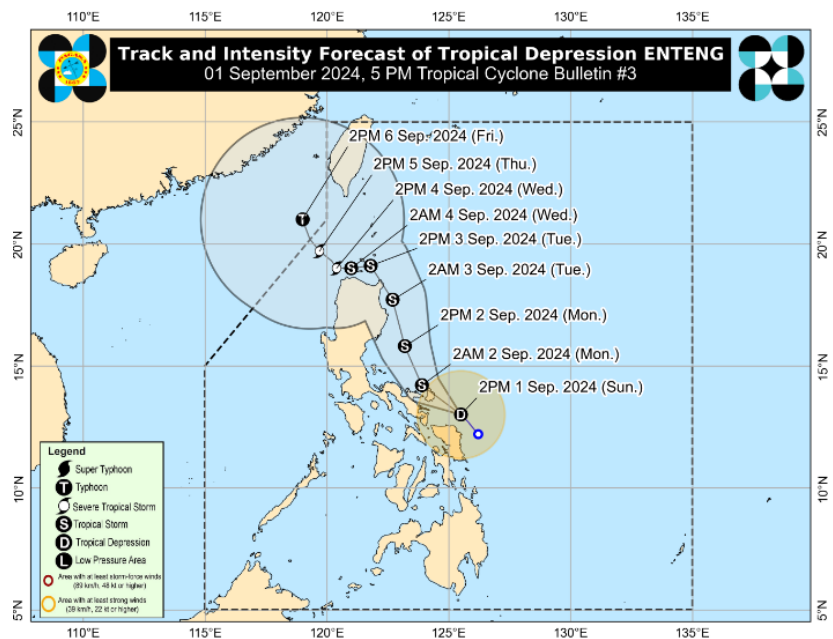

Forecast accumulated rainfall: Tomorrow afternoon to Tuesday afternoon (3 September)

- 100-200 mm: Isabela, Cagayan, Abra, Ilocos Norte
- 50-100 mm: Aurora and the rest of Ilocos Region, Cordillera Administrative Region, and mainland Cagayan Valley

Forecast accumulated rainfall: Tuesday afternoon to Wednesday afternoon (4 September)

- 100-200 mm: Babuyan Islands, Apayao, Ilocos Norte, and the northern portion of Ilocos Sur
- 50-100 mm: Batanes, mainland Cagayan, and the rest of Cordillera Administrative Region and Ilocos Region.

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain induced landslides are likely especially in areas that are highly or very highly susceptible to these hazards as identified in official hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

Furthermore, the enhanced Southwest Monsoon will bring moderate to intense rainfall in other areas of Luzon and Visayas (especially along the western portions).

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.
- The highest possible Wind Signal that may be hoisted during the passage of “Enteng” is Wind Signal No. 2 or 3.

The enhanced Southwest Monsoon will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- From today to tomorrow afternoon: MIMAROPA, Western Visayas, Central Visayas, Negros Island Region, Eastern Visayas (outside Wind Signal areas), Caraga Region, Northern Mindanao, and Zamboanga Peninsula
- From tomorrow afternoon to Tuesday afternoon: Zambales, Bataan, Aurora, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Visayas, and Caraga Region.
- From Tuesday afternoon to Wednesday afternoon: Zambales, Bataan, Aurora, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas.

HAZARDS AFFECTING COASTAL WATERS

- In the next 24 hours, “Enteng” and the enhanced Southwest Monsoon will bring the following conditions over the coastal waters of the country:
- Gale Warning is in effect over Catanduanes, Camarines Norte, the eastern coast of Camarines Sur, the eastern coast of Albay, the eastern coast of Sorsogon, and the northern and eastern coast of Northern Samar. Sea travel is risky for small seacrafts, including all types of motorbancas.
- Moderate to rough seas over the eastern seaboard of Central Luzon and Southern Luzon outside Gale Warning areas (1.5 to 3.5 m), the eastern seaboard of Eastern Samar, and the seaboard of Kalayaan Islands (1.5 to 3.0 m). Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.
- Moderate seas are expected over the southern seaboard of CALABARZON, the remaining seaboard of Bicol Region, Palawan, and Eastern Visayas, the seaboard of Western Visayas, the northern and eastern seaboard of Caraga Region, and the eastern seaboard of Davao Oriental (1.5 to 2.5 m). Slight to moderate seas are possible for the eastern seaboard of mainland Northern Luzon, the remaining seaboard of MIMAROPA, Visayas, and Caraga Region, the seaboard of Northern Mindanao, the eastern seaboard of Davao Occidental (1.0 to 2.0 m). Mariners of motorbancas and similarly sized vessels are advised

to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.

TRACK AND INTENSITY OUTLOOK

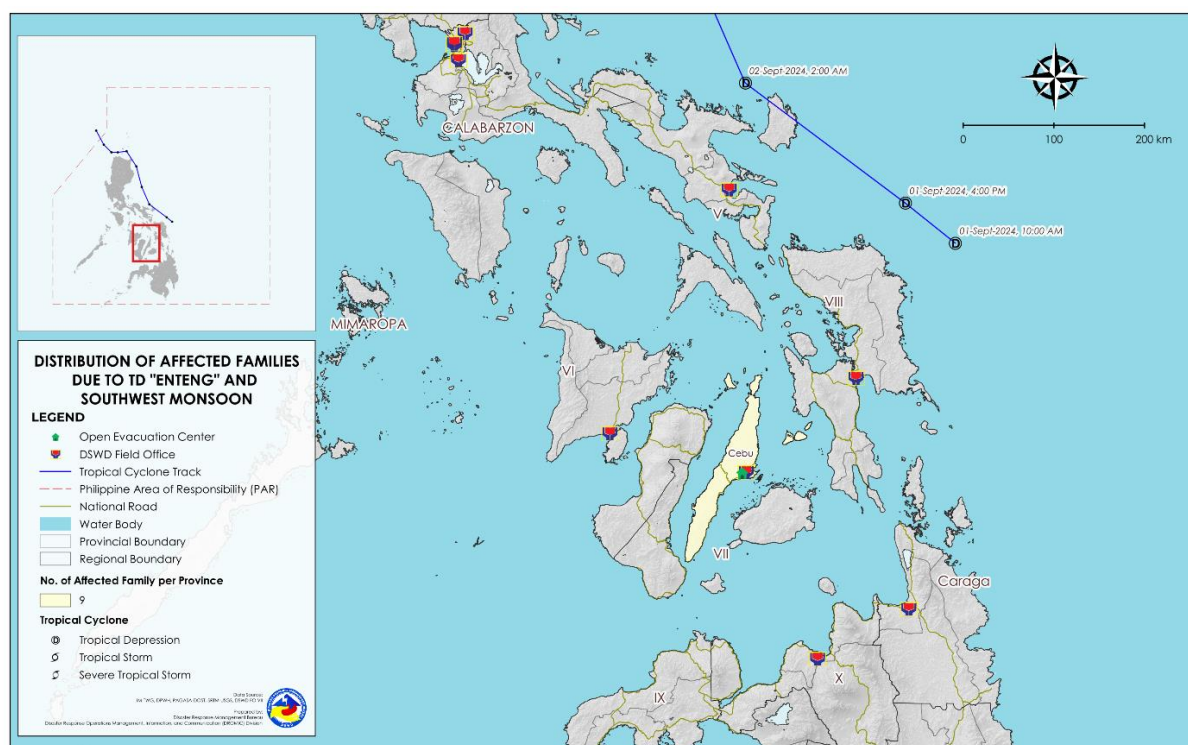

- “Enteng” is forecast to move generally northwestward until tomorrow (2 September) early morning and may make landfall in the vicinity of Catanduanes or Albay in the next 12 hours. For the remainder of tomorrow, “Enteng” will turn more north northwestward or northward after emerging over the waters north of Camarines Provinces and move over the waters east of Luzon. From Tuesday (3 September) to Wednesday (4 September), “Enteng” is forecast to turn northwestward initially, then westward while decelerating over the Luzon Strait. Another landfall in the vicinity of mainland Northern Luzon or Babuyan Islands is not ruled out. A more northwestward movement is expected by Thursday (5 September) onwards.
- “Enteng” is forecast to reach tropical storm category within the next 12 hours. It is forecast to remain at this category until early Wednesday. It may also reach a peak category of typhoon by Thursday or Friday.

The center of the eye was estimated based on all available data 110 km East Northeast of Catarman, Northern Samar (13.0 °N, 125.5 °E) while moving Northwestward at 15 km/h with maximum sustained winds of 55 km/h near the center and gustiness of up to 70 km/h.

II. Status of Affected Areas and Population

A total of **nine (9) families** or **44 persons** are affected in **Brgy. Tisa, Cebu City** in **Region VII** (see Annex A).

III. Status of Displaced Population

Inside Evacuation Center

There are **nine (9) families** or **44 persons** currently taking temporary shelter at the **Tisa National High School** in **Cebu City, Region VII** (see Annex B).

IV. Damaged Houses

A total of **eight (8) houses** were damaged; of which, **seven (7)** are **totally damaged** and **one (1) partially damaged** in **Region VII** (see Annex C).

V. Response Actions and Interventions
