

DSWD DROMIC Report #8 on Kanlaon Volcano Eruption as of 13 December 2024, 6PM

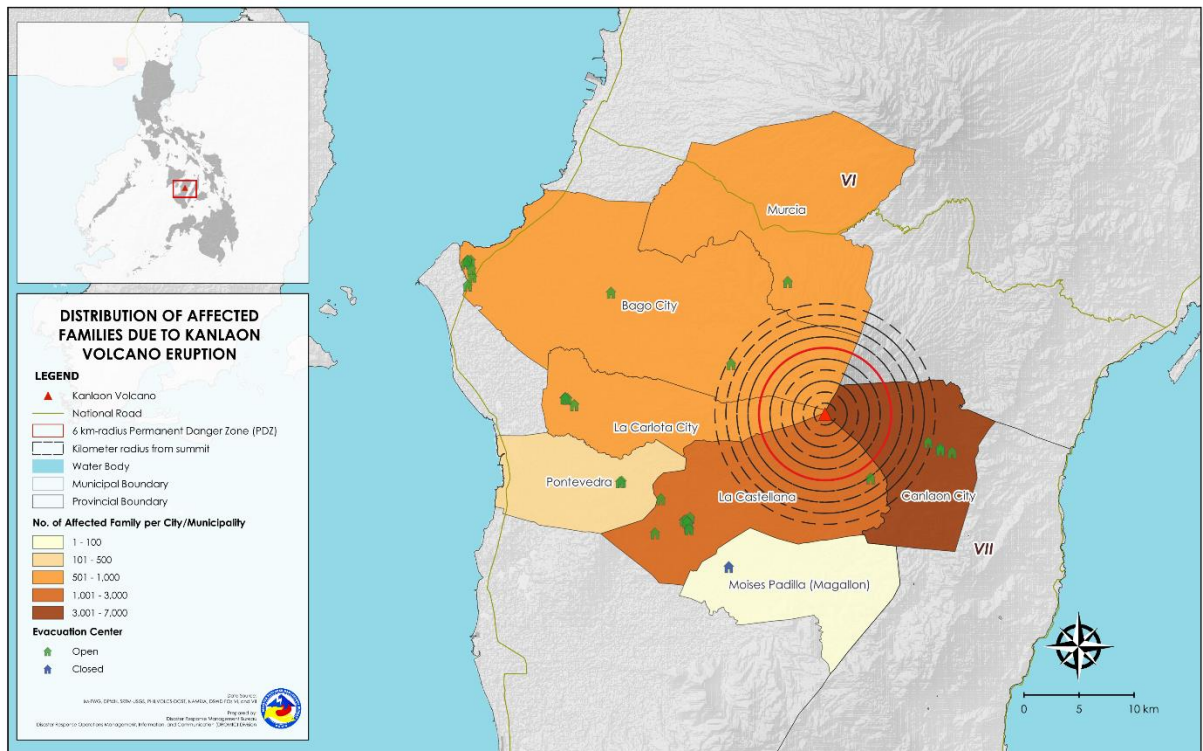

I. Situation Overview

- As of **13 December 2024**, Kanlaon Volcano remains under **Alert Level 3**.
- On 09 December 2024 at 3:03 PM, Alert Level 3 was raised from Alert Level 2 over the Kanlaon Volcano after an explosive eruption that occurred at the summit vent. The eruption produced a voluminous plume that rapidly rose to 3,000 meters above the vent and drifted west-southwest. Pyroclastic density currents (PDCs) descended the slopes on the general southeastern edifice based on IP and thermal camera monitors.
- The raising of the Alert Level of Kanlaon Volcano from Alert Level 2 (increasing unrest) to Alert Level 3 (magmatic unrest) means that a magmatic eruption has begun and may progress to further explosive eruptions. All local government units are advised to evacuate the 6-km radius from the summit of the volcano and must be prepared for additional evacuation if activity warrants.
