

# DSWD DROMIC Report #10 on the Effects of Shear Line

as of 10 March 2025, 6PM

## I. Situation Overview

Issued on 16 February 2025, at around 4:00 AM, cloudy skies with scattered rains and isolated thunderstorms, attributed to Shear Line, brought potential flash floods or landslides to Aurora and the northern portion of Quezon.

On the same day, several barangays in the municipalities of Cagayan and Isabela experienced flooding due to continuous heavy rainfall brought by the Southwest Monsoon.

On 20 February 2025, continuous heavy rainfall in Camarines Norte, Camarines Sur, Catanduanes, Albay, Masbate, and Quezon resulted in localized flooding near river channels and low-lying areas. Furthermore, sustained rainfall in several municipalities of Agusan del Sur led to flooding, displacing families and individuals in the affected areas.

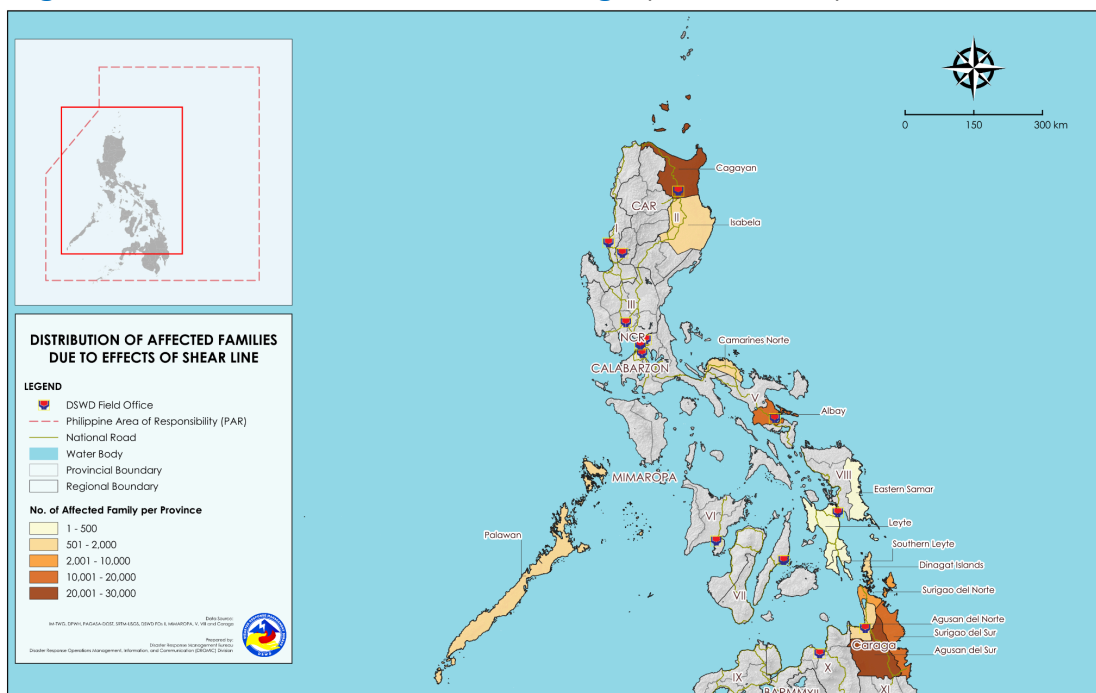

On 21 February 2025, various reports of flooding incidents in Brooke's Point, Palawan were reported due to the continuous heavy rainfall brought by Shear Line.

On 22 February 2025, continuous rainfall brought by the effects of Shear Line was also experienced and caused flooding in some parts of Eastern Visayas.
