

DSWD DROMIC Report #12 on the Structural Vulnerabilities of the San Juanico Bridge

as of 28 May 2025, 6PM

I. Situation Overview

On 15 May 2025, the Department of Public Works and Highways (DPWH) imposed a temporary maximum gross vehicle weight limit of three (3) metric tons on all vehicles crossing the San Juanico Bridge, which connects the provinces of Leyte and Samar. This measure is being implemented due to identified structural vulnerabilities in the bridge.

The restriction on vehicle types allowed to cross the San Juanico Bridge may significantly impact economic activities, delay the delivery of essential services and commodities, and disrupt daily operations, affecting many individuals who depend on this crucial route.
